

AGIR

(Support for Identification and Management of Hazards)

WHAT IS IT ABOUT ?

Designed and developed by Inserm, **Agir** is a software for the benefit of all research units and teams of the institute. It is thought out to centralize and organize the health and safety data of every unit.

FOR WHOM ?

Agir is specially designed for safety and prevention officers in the field, but can also be useful for a wide range of actors including employees:

- **Prevention actors:** unit directors, team leaders, health and safety officers, prevention representatives
 - Carry out analysis and audits
 - Manage hazard inventories
 - Support assessment of occupational risks and hazards

- **Employees:** Inserm or externals
 - Information on occupational risks
 - Report my exposures
 - Check my trainings

(Secured access, comply to RGPD and CNIL requirements)

WHEN ?

Deployed from 2020, the implementation of Agir will be supported on every regional office by a series of trainings for all first responders in the field of health and safety at work.

HOW ?

Agir provides different modules dedicated to several risks with tools for the monitoring and management of the related hazards, as far as it offers a possibility for managing some of your legal requirements.

Chemical hazard

- Build inventories of chemicals and nanoparticles
- Edit and sort lists

Biological hazard

- Build inventories of biological products
- Edit and sort lists

Radioactive hazard

- Build inventories of radionuclides
- Manage radioactive sources and waste

Gas hazard

- Build gas inventories
- Manage gas cylinders

Equipements

- Build inventories of equipments
- Manage controls and maintenance

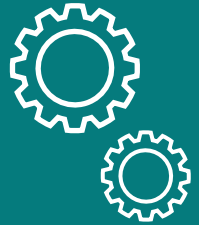

Interactive map

- Display hazards on a plan
- Locate and sort risks

Legal requirements

- Register and monitor your authorizations (radioactivity, GMO agreements, drugs...)
