

# **ACCIDENT WITH** LIQUID NITROGEN OR DRY ICE

(liquid nitrogen -196°C, dry ice -80°C)

# **IMMEDIATE ACTIONS**

#### In case of direct or indirect cryogenic burn/frostbite

• Rinse with lukewarm water (maximum 40°C) without rubbing for at least 15 minutes.

#### In case of eye damage

- Rinse thoroughly with plenty of clear running water for at least 5 minutes, hold eyelids wide open, head tilted back and the affected eye looking downwards.
- Contact lenses tend to get washed away on their own, do not try to manually remove them.
- Do not use any collyre or eye solution.
- Always consult an ophtalmologist even without symptoms.

## In case of hypoxia/asphyxia

- Symptoms: decreased or slower than usual reflexes, headaches, nausea, dizziness, loss of consciousness.
- Alert, ventilate, rescue only if equipped with a self-contained breathing apparatus (ARI) eventualy with a portable oxygen meter (alarm if O2 < 19). Avoid using an unnecessary cartridge mask in the event of a lack of oxygen.
- Breathe fresh air away from the risk area.

# In the event of a serious burn (extensive and/or deep) or asphyxiation, call:

- SAMU (15 or 112),
- Firefighters (18),
- By SMS for the deaf and hard of hearing (114).

### **IN ANY CASE**

- Declare the accident (medical certificate required).
- Inform your **safety manager** immediately.
- All injuries are to be reported using the occupational health and safety logbook.
- Report all incidents to the **Occupational Health Doctor** for investigation and follow-up.

#### PROTECTION MEASURES

- Prior **information** and **training**.
- CPE: ventilated room with O2 detector (visual and audible alarm).
- PPE: apron, face shield + safety glasses, blue cryogenic gloves (EN388, EN420, EN511), closed shoes, protective stockings, warm and covering clothing (long sleeves).
- Use **suitable** and **compatible materials**.
- **Prohibit airtight containers**, handling near a flame or a source of ignition.
- Procedure detailing what to do in the event of an accident.
- Use of pictograms.
